How To Configure PSD Logistics Tag Boards

Last Updated 20/12/2022

Solution

Step	Action
1	Open a PSD Logistics Client by running PSDLogisticsClient.exe using “Run As Administrator”. The default folder for this application is C:\Program Files (x86)\PSDLogistics\Client\. 2	Click the hammer icon, or select “Admin” -> “Logon As Administrator” to log in as a PSD Logistics administrator. If these options are not available, you do not have sufficient permissions to perform this operation. If this is the case, contact your PSD Logistics administrator.

Step	Action
3	Select “Setup” -> “Tag Boards” -> “Tag Boards”. Click “New” to create a new tag board, or double click on an existing tag board to edit it.
4	See the PSD Logistics Help file on how to add/modify/delete Tag Boards. 5	Select “Save” and “Close”.
