

How To Set The Shift Continuation Rule

Last Updated 20/12/2022

Solution

Step	Action
1	<p>Open a PSD Logistics Client by running PSDLogisticsClient.exe using “Run As Administrator”.</p> <p>The default folder for this application is C:\Program Files (x86)\PSDLogistics\Client\.</p> 
2	<p>Click the hammer icon, or select “Admin” -> “Logon As Administrator” to log in as a PSD Logistics administrator. If these options are not available, you do not have sufficient permissions to perform this operation. If this is the case, contact your PSD Logistics administrator.</p> 

Step	Action
3	Select "Setup" -> "Tag Boards" -> "Tag Boards Settings".
4	<p>Select the "On Site Continuation Rule" tab sheet.</p> 
5	These settings are used for determining if someone who goes on site, off site and on site again, is starting a new shift, or continuing an existing one. Set this rule to the most appropriate settings for your site based upon site specific shift patterns.
6	Select "Save" and "Close".
